

Ground Breaking

March 7, 2010

Immediately following Divine Service, the congregation of Grace Lutheran Church moved to the east lawn of their facilities. There a brief Order of Ground Breaking was used to ask God's blessing on the up-coming construction and to give thanks for all of His blessing in the planning and funding of the project.

Construction of the 1700 square foot addition will begin the week of March 21. The new facilities will house updated restrooms, a community room for both the congregation and local organizations to use and the addition of two classroom for the Early Childhood Program and various congregational education programs.

Participating in the dedication were children from the Early Childhood Program, Pastor Pase, DCE Eaton, Joe Wanta - Building Committee Chair, Steve Byrd - Congregation President, Sandy Dains - Early Childhood Representative and Gary Vandergriff - Architect.

Completion of the addition is scheduled for the end of summer.
